**Points to Consider to minimise the chances of ordering an incorrect Barrier and to assist in easier installation of the Barrier.**

**Always refer to the Comments column in the adjoining list before ordering.**

- \* Does the vehicle have any additional Flooring or Lining?
- \* How many sliding doors does the vehicle have?
- \* If the Barrier is a mid position, is it over or in front of the Wheelarches?
- \* Any vehicles with a sunroof fitted call Ausguard to check that this will not effect the installation of the barrier.
- \* Are there any additional seats running down the side of the vehicle?
- \* Is the Cargo Blind bracket kit required?
- \* Are there any airconditioning ducts, spare tyres, stereo systems, speakers etc. That may interfere with the installation of the Cargo Barrier?
- \* Where there is an asterix next to the price code the cargo barrier requires an emergency hammer to meet the New Australian/ New Zealand standard.
